Introduction

- ▶ **Travel Voice** is a tourism feedback platform that helps travelers explore places, share reviews, and report issues. It connects users, businesses, and tourism authorities to improve services and create a better travel experience through feedback.

Problem Statement

- ▶ Travelers struggle to find reliable information about places and services.
- ▶ Tourism issues and complaints are not managed effectively.
- ▶ Need for a system to improve tourism quality through user feedback.
- ▶ Lack of a proper platform to share reviews and feedback.

Motivation

- ▶ To create a platform where travelers can share experiences, provide feedback, and report issues to improve tourism services.
- ▶ To promote transparent communication between travelers, businesses, and tourism authorities while making travel more reliable and enjoyable.

Features

- ▶ Explore destinations, hotels, restaurants, and attractions easily.
- ▶ Share reviews and ratings to help other travelers.
- ▶ Submit complaints and provide feedback about services.
- ▶ Secure user login and admin dashboard for managing issues.
- ▶ Improve tourism services through community feedback.

Objective

- ▶ To provide a platform for travelers to share reviews, ratings, and feedback.
- ▶ To improve tourism services by identifying and resolving user complaints.
- ▶ To create better communication between travelers and tourism providers.

Platform/Dev. Environment

Technology	Purpose
HTML	Structure
CSS	Design/UI
JavaScript	Interaction
Supabase	Authentication & Database
Font Awesome	Icons

Conclusion

- ▶ TravelVoice provides a simple and effective way for travelers to share experiences, report issues, and improve tourism services through feedback. The platform helps create a more transparent, reliable, and better travel experience for everyone.
